

PRESS RELEASE

2017-12-21

Reliacore AB merge with PDSVision AB

Dear PDSVision and Reliacore customer,

PDS Vision Group is the largest Northern European partner to PTC covering Arbortext, Creo, ThingWorx and Windchill. Beginning of 2012 PDS Vision Group acquired Reliacore and have since been working closely together with our other group companies in Northern Europe.

Now more than ever the reliability, availability, maintenance and security (RAMS) has become more integrated in the product development process and therefore we have decided to **merge Reliacore AB with PDSVision AB. Our company name going forward is PDSVision AB.** This integration will be in full effect as of 1 Jan 2018. This merger will impact some of our internal processes including invoicing and emails.

However, there are some things that will never change:

- Our commitment to quality related challenges
- Our staff will remain the same plus we have complemented with more support engineers to assist you
- Our commitment to be a spirited group for our customers.

PDSVision AB is focused on software solutions for product development and aftermarket with local offices in Sweden. The company is the largest PTC partner in the Nordics and supports the majority of the solutions developed by PTC. Additionally, Windchill Quality Solutions (WQS) is since long well known due to several mutual projects and shared technical resources.

– It is of strategic importance for PDSVision to integrate the Reliacore business even tighter to our business. By tapping into an already existing business we obtain key competencies that will give us an opportunity to further develop ourselves within both existing and new customers. This will in the end give customers, PDSVision and our supplier PTC extended benefits, says Otto Wetterlin, CEO, PDSVision AB.

Please reach out for any questions around this merger.
